Step One

Click "**Add Project"** to begin a new website submission.

Step Two

Enter your personal profile information in the relevant fields.
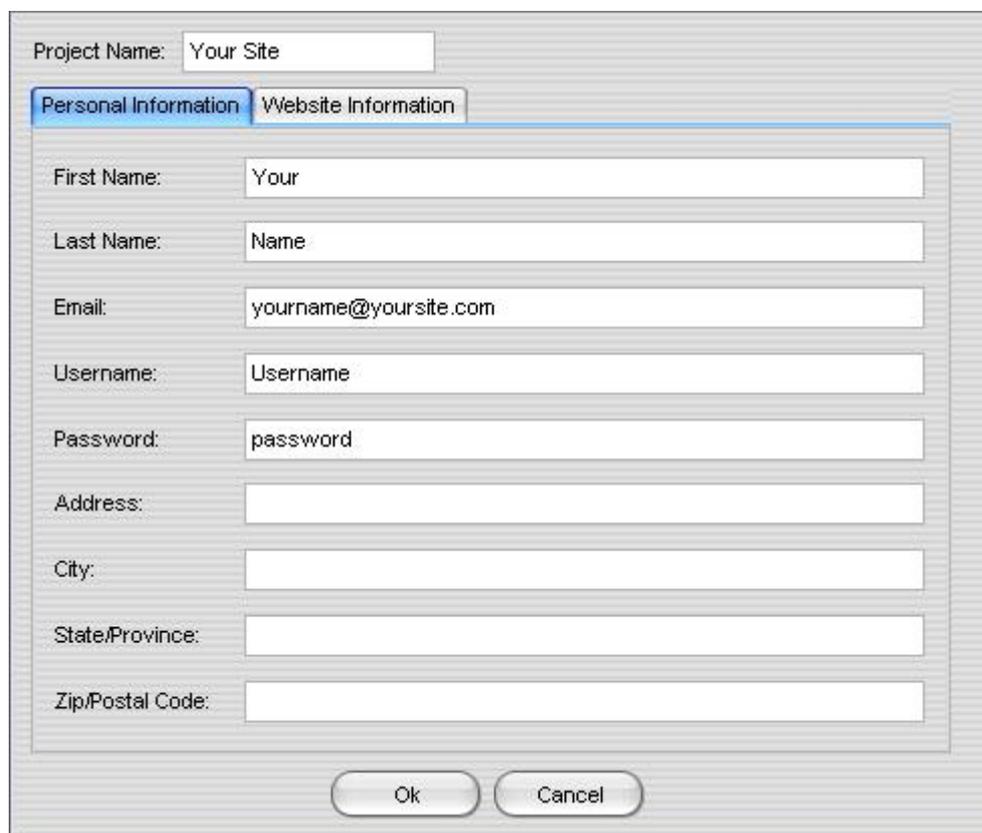

Step Three

Enter your website information for each directory.
   Including: -

       Your Website URL
       The Title of your Website
       A Short description of your Website
       Keywords, so your site can be found by searching directories
       A Reciprocal Link* – (some directories may ask for one)
       *A **reciprocal link** is a mutual link between two objects, commonly between two websites to ensure mutual traffic. Source: <u>Wikipedia</u>

As you can see, the option is available to enter a variety of Titles, Descriptions and Keyword Lists, which will be rotated as you submit to various directories – so your entries don't necessarily all have to be the same.
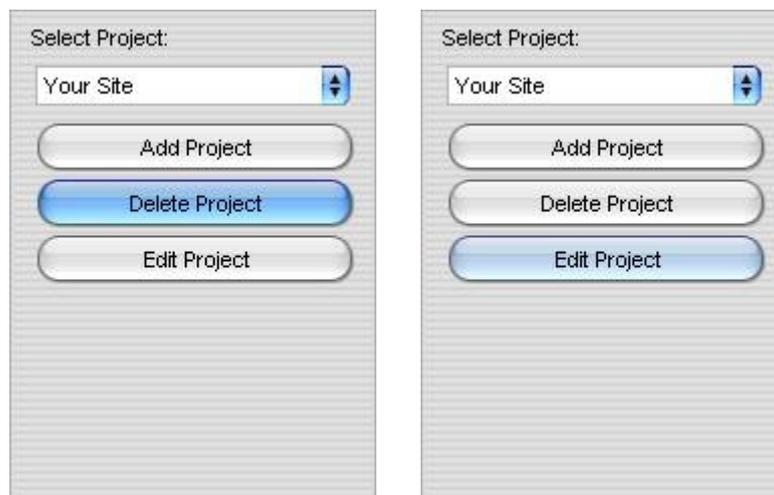

Step Four

Give your project a name, for easy tracking – Something like the name of your site. Click 'OK'

You can also delete or edit a project. Select one from the drop down menu to modify as required.
