This software requires an MS Windows operating system.

If the program doesn't run properly then probably you haven't got Microsoft .NET Framework 3.5 SP1 installed. You can download it (for free) by visiting http://www.microsoft.com/downloads/details.aspx?FamilyID=ab99342f-5d1a-413d-8319-81da479ab0d7&DisplayLang=en

This software will install on the current user. If another user on your computer wishes to use it then they need to install it on their own user.

If you are Upgrading then replace all the old files with these new files; and copy any extra files. Your data will not be lost.

Run "Shopping List Predictor 1.exe".

Feel free to redistribute (to friends and family …) the "Shopping_List_Predictor_1.zip" file via e-mail, flash drive, CD, DVD, floppy disc, …
